

The Future of Privacy.

The Hidden Battles to Collect Your Data and Control Your World

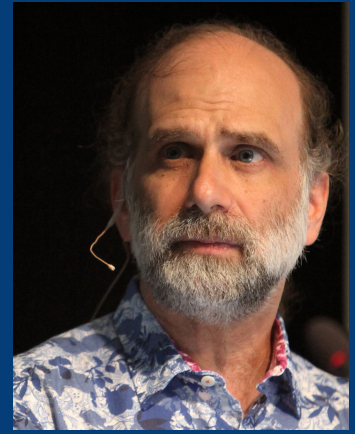

The powers that surveil us do more than simply store information, about our purchasing patterns, friends or thoughts. Corporations use surveillance to manipulate the news articles, advertisements and prices we're offered. Governments use surveillance to discriminate, censor and put people in danger. Both sides share information with each other or lose it to cyber criminals. Much of it is voluntary, we cooperate because of promises of convenience and protection. But have we given up more than we've gained? In his book *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy.

Comments by:

Susanne Wigorts Yngvesson, Associate Professor in Ethics, Stockholm School of Theology. Her main research area concerns media ethics; surveillance and ethics in relation to technology.

Torbjörn Tännsjö, Professor of Practical Philosophy, Stockholm University. He is among other things known for debating bio ethics and writing about global democracy. His book "Privatliv" was just published in paperback edition.

Moderator: Henrik Berggren, journalist and writer.

BRUCE SCHNEIER

Bruce Schneier is an American cryptographer, computer security and privacy specialist, and writer.
